

FERROFORM ECO LOCC SPRAY

Environmentally harmless penetrating oil based on synthetic esters

Performance Features

- excellent penetrating properties
- frees rusted components
- protects against corrosion
- displaces water
- simplifies assembly and disassembly operations
- environmentally harmless and rapidly biodegradable

Description

FERROFORM ECO LOCC SPRAY is a light-coloured, rapidly biodegradable, rust freeing agent based on synthetic oils containing corrosion inhibitors. The additives significantly reduce surface tension, thus improve the product's wetting performance. The corrosion prevention agents displace water (dewatering effect) and enable the formation of a protective film which offers good lubricity. The product also infiltrates rust layers and loosens the rust.

Field of application

FERROFORM ECO LOCC SPRAY can be used in all technical areas. It is approved for the use in the mining industry.

Method of application

Apply FERROFORM ECO LOCC SPRAY simply uniformly onto the components which have to be protected. FERROFORM ECO LOCC is also available as a propellant-free pump spray as well as in standard packaging.

Typical for current production. Variations in these characteristics may occur.

As far as we know this information reflects the current state of knowledge and our research. It cannot, however, be taken as an assurance about the properties nor as a guarantee of the suitability of the product for the individual case in point. Before using our products the purchaser must, therefore, check their suitability and be satisfied that the output will be satisfactory. Please be aware that our products must not be used for applications in nuclear primary circuits or on-board aerospace systems. Our products undergo continuous improvement. We therefore retain the right to change our product program, the products, and their manufacturing processes as well as all details of our product information sheets at any time and without prior announcement, unless otherwise provided in customer-specific agreements. With the publication of this product information sheet, all previous editions cease to be valid.

We are specialized in developing products for extreme tribological problems in cooperation with end users.
